Subject: 2013 Ignacio Ozone Stratospheric Intrusion
To: Brenda Jarrell <bjarrell@southernute-nsn.gov>, Gordon Pierce - CDPHE <gordon.pierce@state.co.us>

Dear Ms Jarrell:

The Colorado Department of Public Health and Environment, Air Pollution Control Division (APCD) is currently evaluating calendar year 2013 ambient ozone data for potential stratospheric ozone intrusion events, and wildfire smoke events that may be considered for Exceptional Event status as defined by the Code of Federal Regulations Title 40 Parts 50 and 51. The APCD has identified one stratospheric intrusion event in 2013, which appears to have significantly affected the Ignacio ozone monitor. Please see the attached letter for details regarding this event. The APCD is supplying this information as a courtesy to the Tribe. If the Tribe selects to flag the identified data, then subsequently, if the APCD selects to fully document this event and pursue exceptional event concurrence with the EPA, the Ignacio site could be include in this determination with approval from the Tribe. Please contact me with questions or comments.

Respectfully,
Greg
